

16 HEADS PRODUCT FILLING

- Working System : Rotary (Rotary and Continuous Movement)
- Control System : PLC System
- Construction : Steel Construction, All Visible Parts AISI 304 Quality,
- Container : Tinsplate, Aluminum
- Cylinder Volume : 300 ml (may be revised after clarification of products)
- Nozzle : 16 (special inside closing type)
- Filling Accuracy : $\pm 1\%$
- Filling system : Volumetric
- Energy Consumption : 1 kw
- Valve Type : Tin/aluminum
- Air Requirements : 6-8 Bar
- Air Consumption : 1200 Lt/ min.
- Mechanical crimping
- Conveyor Motor : Ex-proof
- Developed and easy usage PLC Control system & touch screen LCD Operator Panel Easily operating and quick setting for each different bottle parameters on PLC control panel
- Automatically switch off completely leakage proof nozzles system
- Machine stops when entry empty & exit busy/container squeezing situations
- Easy service and maintenance
- ATEX button box HMI panel
